Poznámka k DÚ4:

5 bodov bolo za prípravu dát a zistenie, s akými dátami (pôvodné, diferencie, druhé diferencie) môžeme pokračov

5 bodov bolo za nájdenie vhodného ARMA model

Na získanie nenulového počtu bodov bolo potrebné získať správny výsledok

Za prvú časť teda bolo 0 bodov, ak ste vyhlásili nestacionárne dáta za stacionárne alebo ste ich prediferencovali.

(Ale ešte sa dali získať body za druhú časť, aj keď to prakticky už vyhovujúci model byť nemohol.)

Za druhú časť bolo 0 bodov, ak ste napríklad navrhli model, ktorý má autokoreláciu v rezíduách
