## Open position

The Central European Labour Studies Institute (CEL SI) based in Bratislava, Slovakia, fosters internationally recognized multidisciplinary research about labour markets and institutions, work, employment and organizations, and ethnicity and migration in the economic, social, and political life of modern societies. Please read more about us at [www.celsi.sk](http://www.celsi.sk). We are part of the international research team of the worldwide WageIndicator network. For our tasks within WageIndicator, we are looking for a

## DATA ANALYST (full-time)

with an excellent potential for data collection, processing and analysis

### Your duties

- data management for the WageIndicator network worldwide, in particular:
  - designing, maintaining and innovating a large-scale web-based survey (similar to a labor force survey)
  - data processing – preparation of datasets based on the survey
  - data analysis – applied research using the above dataset
- support to clients/researchers worldwide regarding datasets, survey questionnaires, and similar
- communication with clients/researchers worldwide regarding datasets, survey questionnaires, and similar
- research assistance in international research projects (FP7 and similar)
- analytical support for press releases, media appearances and research reports using the available datasets

### Your profile

- university degree (Master's or higher) in mathematics, economics, econometrics, or similar
- advanced/proficient user of SPSS or STATA
- willingness to master both SPSS and STATA
- computer literacy; MS Excel in particular
- excellent knowledge of English (English is the working language for all your duties)
- experience/interest in academic and/or project-based research
- reliability, flexibility, creativity
- motivation to work in a dynamically growing young research institute
- motivation to interact with clients/researchers worldwide on a daily basis through internet

### What we offer

We are an open-minded, motivated team of young researchers and data analysts. We offer a stimulating research environment with excellent contacts in our international research networks. The place of employment is Bratislava, Slovakia. The initial

employment contract will be for one year. An extension is intended. The open position is also suitable for graduates with experience in data collection/processing/analysis.

For questions, please refer to Dr. Marta Kahancová ([marta.kahancova@celsi.sk](mailto:marta.kahancova@celsi.sk)). Please send your electronic application (cover letter, CV, relevant academic work and 2 recommendations) in one pdf file before February 29, 2012 stating 'Data analyst' in the subject line, to: [marta.kahancova@celsi.sk](mailto:marta.kahancova@celsi.sk).
