

# Financial risk analyst wanted

Do you want to be part of one of the fastest developing teams working for the largest banks in the region?

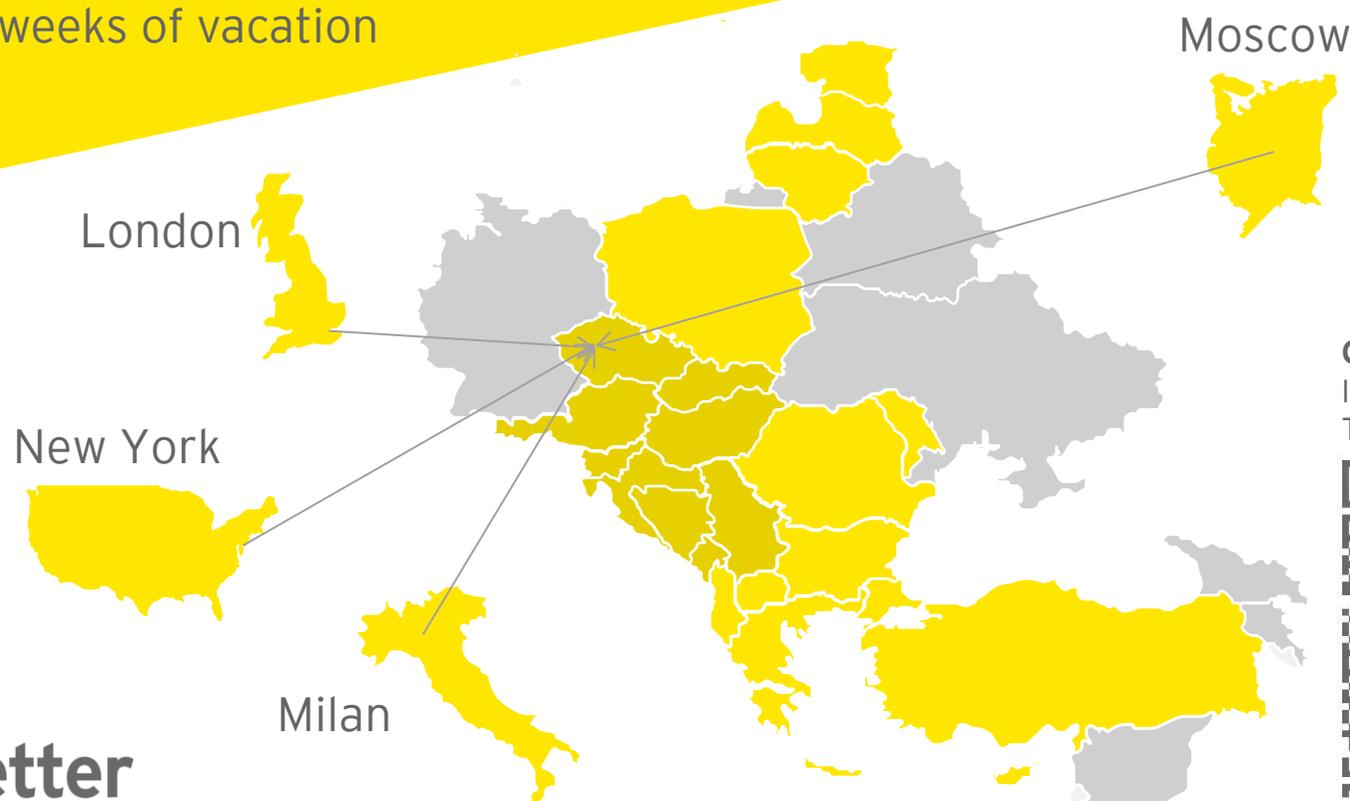

Are you finishing Master's degree in mathematics or statistics? Would you like to use your knowledge in practice?

## If yes, join us at EY!

- ▶ You will work closely with all major financial institutions operating in Europe, Asia and the US in the team of 80 professionals.
- ▶ You will gain risk management expertise, such as model development and testing, using stochastic processes, time series analysis, decision trees, Markov chains, several types of regression and other statistical approaches.
- ▶ You will enhance your coding skills in SQL, SAS, and R.
- ▶ We offer you the possibility to travel for projects abroad and 6 weeks of vacation on top of it.
