

## **RPA Consultant – Service Delivery Center**

### **Who we are and what we are doing**

PwC Slovakia is looking for a Business Process Engineer to join our Advisory, Service Delivery Practice, serving top clients across Europe. Business Process Engineer would become a part of delivery teams on our advisory projects combining global experience with local skills and industry knowledge to deliver premium software solutions for the world's leading companies in the financial industry.

Our teams provide wide range of technology-based services:

- > designing strategies and adapting global trends to local business reality,
- > streamlining, simplifying, and transforming operating models and enterprise architectures,
- > identifying best-fitting technologies, combining traditional providers with new kids-on-the-block (FinTech, Disruptors),
- > implementation / system integration of banking / insurance core systems,
- > custom software development on leading technological platforms for business process management, digitization and process automation, and
- > provision of PM / content-heavy PMO services, and assuring quality of delivery on large system integrations and implementations.

We combine a strong industrial background with in-depth technology expertise, bringing global trends and best practices, tailored to local specifics, and delivered in local languages. Our people are former bankers / insurers and technology engineers who leverage the best of both worlds and allow our clients to avoid the usual compromise from the trade-off between technological sophistication and the ability to speak the “business language”.

Our team offers a unique opportunity to:

- > experienced professionals ready to make the next step in their careers to capitalize on previous experiences, while enjoying entrepreneurial freedom and independence,
- > young graduates looking to fly high on their learning journey to boost growth, and shape their own career path curve at the largest professional services company in the world.

Our team is based in Bratislava, in Slovakia and operates in geographical territory we call *"our part of the world"*. Our projects span the globe from New York in the west, to the UK, through continental Europe, North Africa, Middle East, and the countries of the former Soviet Union as far as Almaty in the east.

Our local Advisory practice is among the fastest growing in our network and we are looking for new talents to join us.
