

Junior Pricing Analyst

Come and join our friendly and dynamic team!

The candidate will work closely with the Zurich Commercial Insurance central actuarial pricing team focusing on big commercial customers and support the execution of the pricing work.

The pricing team currently oversee circa USD 3.5bn of premium being transacted through with our shared pricing models & tools. The candidates will contribute to maintaining the quality of our rating / pricing solutions. The team works closely with the CI Underwriting Lines of Business heads to support the overall product strategy as well as UW performance management activities.

The role and responsibilities will primarily include the following areas of work (but not limited to)

- **Data stewardship** – It is all about data, right? You will establish and maintain pricing datasets. It will also include supporting and overseeing the data quality work as well as process & extract with central data lake capabilities to support analytical analyses
- **Statistical & Actuarial Analyses** - You will predict the future. Ratemaking and development of pricing models will help us remain profitable.
- **Pricing maintenance** – Make sure your analysis is actually used. You will deliver it through the annual update of the central pricing platforms, including the pricing models calibration
- **Business reporting & pricing monitoring** – Keep an eye on keeping our promises. Administering the reporting capabilities and performing trends analyses and deliver insights back to Product and Market facing teams.
- **Portfolio strategy and modelling** – And also help forming a view where we will be in a couple of years. This can only be achieved by supporting completion of portfolio profitability reviews to help the formulation of UW strategies & tactical plans.

Requirements:

- University student of Mathematics, Computer science or similar field,
- Willingness to embrace actuarial career,
- Fluent in English,
- Advanced computer skills (programming in R is an advantage).
