

Actuarial Capital Management Analyst

Your responsibilities would involve:

This is an excellent opportunity to build expertise in capital management and economic valuation techniques, and gain experience of regulatory reporting under the modern Swiss regulatory regime.

You will be a part of a team instrumental in assessing and projecting solvency and recommending the amount of dividends. You will maintain robust, disciplined and efficient reporting and control processes as the foundation for business insight in a rapidly changing environment.

Your main activities will include:

- Timely and accurate delivery of tied assets and local statutory solvency positions
- Assessment of dividend paying capacity
- ORSA and SST reporting, related controls, documentation and process enhancements
- Maintenance, development and efficiency improvements for related capital management processes, systems – including link to data providers and their systems

Requirements:

- Master's degree in a numerate subject (e.g. mathematics, physics, financial economics, statistics and / or actuarial science)
- Happy working to deadlines and within a strong control environment
- Excellent communication skills in English (written and oral)

Salary offer starts on 1400EUR in gross.
